Fibromyalgia Pain

What Is Fibromyalgia?

Fibromyalgia is a long-term, chronic disorder known for causing pain throughout the body, extreme fatigue, and cognitive difficulties. This condition is often challenging to diagnose because its symptoms mimic those of other disorders, and there are no specific lab tests to confirm it. The pain experienced with fibromyalgia is typically described as a constant dull ache that lasts for months and affects many areas of the body.

What Are Some Causes of Fibromyalgia?

The exact causes of fibromyalgia remain unknown, but it is thought to involve a variety of genetic, environmental, and psychological factors. Some researchers believe fibromyalgia amplifies pain signals by affecting the way your brain processes them. Certain triggering events such as physical trauma, surgery, infection, or significant psychological stress may also set off or exacerbate symptoms.

Are There Common Symptoms of Fibromyalgia?

Common symptoms of fibromyalgia include widespread pain, fatigue, and cognitive difficulties. Patients often describe the pain as a constant dull ache that lasts for several months and affects many areas of the body. Fatigue is also a common complaint, with patients waking up feeling tired despite having slept for long periods. Cognitive difficulties, or “fibro fog,” can affect the ability to pay attention and concentrate on mental tasks.

What Areas of the Body Are Affected?

Fibromyalgia can cause pain in any part of the body, but it's most commonly reported in the neck, back, shoulders, pelvic girdle, and hands. These regions often experience a persistent dull ache and tenderness, which can be exacerbated by physical activity, or stress.

What Are Treatment Options for Fibromyalgia?

At Pain and Spine Specialists, our patient-centered approach to addressing fibromyalgia focuses on providing compassionate care and tailored treatment options to enhance healing.

- **Physical Therapy Referrals:** We prioritize your comfort by facilitating physical therapy referrals, aiming to improve your strength, flexibility, and overall function, empowering you to navigate daily activities with greater ease and reduced discomfort.
- **Transcranial Magnetic Stimulation (TMS):** Through the innovative use of TMS, we aim to modulate brain activity to alleviate fibromyalgia symptoms, offering a non-invasive and effective approach to managing your condition and promoting your overall well-being.
- **Trigger Point Injections:** By targeting specific areas of muscle tension and discomfort, trigger point injections offer meaningful relief from localized pain associated with fibromyalgia, prioritizing your comfort and mobility.
- **Acupuncture:** We embrace holistic approaches and offer acupuncture as a treatment option for fibromyalgia. Through the strategic placement of fine needles, we aim to restore balance and alleviate symptoms, supporting your journey toward greater comfort and vitality.

WHAT TO EXPECT

Individuals looking to schedule a new patient appointment will be guided through the entire process by one of our new patient coordinators (NPC). Our NPCs will thoughtfully listen to your concerns and gather the appropriate information to schedule. Our practice understands that living with chronic pain is difficult, and we prioritize scheduling a new patient appointment within a week of their first phone call.

New patients can schedule an appointment in any of our convenient locations and are not required to complete any imaging before being seen.

WHY CHOOSE US

Board-Certified Doctors and Fellowship Trained Physicians

Comprehensive Treatments That Target The Root Cause

Cutting Edge Regenerative & Alternative Therapies for Pain

We Accept All Insurances. Including Medicaid & Medicare

BOARD-CERTIFIED DOCTORS

Our advanced pain specialists make it a priority to remain up-to-date with current treatments and scientific research.

Knowledge of the most modern techniques and medical practices provides patients with the best care. Our pain management doctors regularly participate in continuing education units (CEUs) and conferences to enhance their proficiency in the medical field for the betterment of our patients.

COMPREHENSIVE SERVICES

Chronic Pain Relief

Medical interventions can alleviate the symptoms and underlying causes of long-lasting pain.

Workers Comp & Personal Injury Claims

Whether you are in pain from a personal or work-related injury, we can help you recover.

Personalized Pain Management

Individualized treatment plans effectively treat your pain and improve your range of motion.

Minimally Invasive Treatments

Outpatient procedures produce less pain, reduced risk of complications, and a shorter recovery time.

“

Dr. Sudhir Rao is such an amazing doctor! During my first visit, he never tried to rush through my appointment; he genuinely listened to all my concerns and then took his time to explain all his recommendations to me in detail and how they would help me.

Nikki Walker

Healthgrades.com 

“

Completely the best care you could want. The staff is so pleasant and caring, and the doctors have a true heart for healing. I love being a patient here and would give ten stars if I could—absolutely the most caring during my procedure with Dr. Suhas Badarinath.

Catherine C.

Google Review 

“

I have been with Dr. Rao for 13 years. He is the most caring doctor I have ever been to! Dr. Rao makes you feel very comfortable at all times. I would not want to go to any other doctor. I go to the Hagerstown location, and everyone is very nice.
