Medication Management

What Is Medication Management?

Medication management is a patient-centered approach to treating chronic pain, specifically targeting debilitating back pain. This treatment option involves a comprehensive assessment of a patient's current prescriptions, underlying health conditions, and pain levels to develop a tailored medication treatment plan. The goal of medication management is to provide effective pain relief while minimizing side effects and ensuring the safe use of medications.

What Conditions Can Be Helped?

Medication management can treat various conditions related to chronic back pain, such as degenerative disc disease, spinal stenosis, and sciatica. By utilizing different classes of medications, including NSAIDs, muscle relaxants, anticonvulsants, corticosteroids, and opioids, patients can experience significant pain relief and improved quality of life.

Who Would Benefit from Medication Management?

A good candidate for medication management is an individual who suffers from chronic back pain that has not responded well to over-the-counter medications or conservative treatments such as light activity or physical therapy. Patients must discuss their current medications and medical history with a pain specialist to ensure they receive a safe and effective treatment plan.

Benefits of Medication Management Programs

Regain Control: You are empowered to regain control over your pain by actively participating in a personalized medication management program, allowing for a more predictable and manageable pain experience on a daily basis. This proactive approach focuses on optimizing your comfort and functionality, enabling you to reclaim aspects of your life that may have been limited by pain.

Personalized Approach: You benefit from a customized medication management approach that considers your unique pain condition, medical history, and lifestyle, ensuring that the treatment plan is tailored to your specific needs. This ongoing customization fosters a sense of support and understanding, allowing for adjustments that align with your evolving requirements, ultimately leading to improved pain management and overall well-being.

Improved Quality of Life: Through the tailored support of a medication management plan, you can experience enhanced enjoyment of life as the program adapts to your changing needs, ensuring ongoing relief and support. By addressing your pain at its source and providing consistent, personalized care, you gain the freedom to engage in activities that bring you joy and fulfillment, enhancing your overall well-being.

WHAT TO EXPECT

Individuals looking to schedule a new patient appointment will be guided through the entire process by one of our new patient coordinators (NPC). Our NPCs will thoughtfully listen to your concerns and gather the appropriate information to schedule. Our practice understands that living with chronic pain is difficult, and we prioritize scheduling a new patient appointment within a week of their first phone call.

New patients can schedule an appointment in any of our convenient locations and are not required to complete any imaging before being seen.

WHY CHOOSE US

Board-Certified Doctors and Fellowship Trained Physicians

Comprehensive Treatments That Target The Root Cause

Cutting Edge Regenerative & Alternative Therapies for Pain

We Accept All Insurances. Including Medicaid & Medicare

BOARD-CERTIFIED DOCTORS

Our advanced pain specialists make it a priority to remain up-to-date with current treatments and scientific research.

Knowledge of the most modern techniques and medical practices provides patients with the best care. Our pain management doctors regularly participate in continuing education units (CEUs) and conferences to enhance their proficiency in the medical field for the betterment of our patients.

COMPREHENSIVE SERVICES

Chronic Pain Relief

Medical interventions can alleviate the symptoms and underlying causes of long-lasting pain.

Workers Comp & Personal Injury Claims

Whether you are in pain from a personal or work-related injury, we can help you recover.

Personalized Pain Management

Individualized treatment plans effectively treat your pain and improve your range of motion.

Minimally Invasive Treatments

Outpatient procedures produce less pain, reduced risk of complications, and a shorter recovery time.

“

Dr. Sudhir Rao is such an amazing doctor! During my first visit, he never tried to rush through my appointment; he genuinely listened to all my concerns and then took his time to explain all his recommendations to me in detail and how they would help me.

Nikki Walker

Healthgrades.com 

“

Completely the best care you could want. The staff is so pleasant and caring, and the doctors have a true heart for healing. I love being a patient here and would give ten stars if I could—absolutely the most caring during my procedure with Dr. Suhas Badarinath.

Catherine C.

Google Review 

“

I have been with Dr. Rao for 13 years. He is the most caring doctor I have ever been to! Dr. Rao makes you feel very comfortable at all times. I would not want to go to any other doctor. I go to the Hagerstown location, and everyone is very nice.
